

2022 Product Catalog

Continuing to inspire for 75 years.

The way we see it, how you serve is just as important as what you're serving. American Metalcraft products elevate food service in every form—restaurants, grocery stores, hotels and catered events alike. To see the difference that incredible presentation can make, look to the little things. Whether we're making barware or buffetware, we find opportunities to incorporate unique details, exceptional functionality and on-trend designs. Our goal is always to make your culinary creations the best possible versions of themselves.

Seventy-five years ago, we broke into the industry by turning hubcaps into deep-dish pizza pans and custom plate covers. We've since grown our product line into an expansive, eclectic collection of food presentation solutions. In these pages, you'll discover creative tabletop accessories, innovative kitchen supplies and every other tool you need to craft an incredible dining experience.

This year we are proud to celebrate our seventy-fifth anniversary being part of this industry that we love. Whether you're a first-time browser or a longtime customer, we hope you find inspiration in our collection. And remember, behind every great meal is great presentation.

THE UNITY COLLECTION

Finally, a contemporary take on melamine dinnerware that provides the ultimate canvas for today's modern cuisine: The Unity Collection. Named for the intersection of form and function, the Unity Collection combines a clean, straight-sided and stackable design with the durability of melamine. The result is delectably inspiring.

Available in a wide variety of shapes, sizes and capacities, this dual-toned collection features colorways to approach both the coolest and warmest of decors. Intermix the Graphite and Mocha colors together, add a splash of stainless and a touch of Tritan™ and your recipe is complete. The look is truly extraordinary.

THE CRAVE COLLECTION

Our Crave Collection of break-resistant melamine dinnerware is back and bigger than ever. In a wide variety of plates, platters, bowls and mugs, this is not your grandma's melamine. Fast forward, rather, to the 21st century, where technological advancements in designs, materials and manufacturing techniques create artisan-quality melamine that captures the look and feel of china—all at a fraction of the cost and two to three times the service life.

NSF-certified and BPA-free, the Crave Collection is safe in terms of durability, design and ability to be thoroughly sanitized. In two base colors and new additional color options, each artisanally designed piece features organic edges to elevate food service everywhere.

THE JANE COLLECTION

Dinnerware has a new standard. The Jane Collection, our “basic” dinnerware line, is anything but ordinary. Simple and versatile by design, these plates, bowls, cups, platters and even sauce cups serve as ideal backdrops for all types of menu items. From low-key lunches to gastronomically-inspired dinners, the possibilities are practically endless.

We chose to craft the Jane Collection from melamine for two reasons: First, it's exceptionally resilient to the bumps, bangs and bounces that find their way into every kitchen. This dinnerware is in it for the long haul. Second, melamine is dishwasher-safe. No matter how you're inspired to fill these blank canvases, cleaning and reusing them is a cinch.

Inspired by classic china, these timelessly nostalgic pieces feature beautiful floral designs that could pass as individually made. Whether you use them to serve entrées, hors d'oeuvres or desserts, your customers just might be transported to a Florentine patio when this collection reaches the table. Because the Isabella Collection is crafted from BPA-free, NSF-approved melamine, you can create elegant presentations day after day and night after night without concerns of safety or durability.

STANDARD STOCKED PLATE COVERS

Need to please a crowd in a pinch? Our most popular plate covers are now available for rapid turnaround. Made of durable satin-finished stainless steel, these covers feature top-of-the-line heat retention and odor resistance. A well in the top of each cover fits the foot of many different plates. Just measure the diameter of the plate and note the design of the foot to determine the best option. We can also help guide you to the right cover choice with key details about the plate (manufacturer, model and/or size) or by sending a sample plate. All covers are 2" in height and include a finger hole. For help ordering, call 800-333-9133 or email platecovers@amnow.com.

THE MELAMINE NATURALS COLLECTION

At first glance, these boards look like real stone and wood serving pieces. But upon closer examination, they're actually crafted from durable, dishwasher-safe melamine.

Dual-Tone Marble Melamine Serving Platters

For our next trick, we've created melamine serving boards that are practically indistinguishable from black-and-white marble. A high-end look that's guaranteed to turn heads.

Pizza Pans & Supplies

A Guide to our Pizza Pans

Aluminum Pans

Aluminum is an excellent conductor of heat, providing evenly baked crusts.

Standard-weight pans (denoted with "A" at the beginning of the item number) are made from 18-ga., 0.040", 1 mm aluminum.

Heavy-weight pans (denoted with "HA" at the beginning of the item number) are made from 14-ga., 0.064", 1.5 mm aluminum and are 50% heavier than standard-weight.

- Hand-washing with aluminum-safe detergent is recommended.
- Through repeated use, pans will soften and, if scoured, will thin.

ALUMINUM (A/HA)

Tin Plate Pans

Tin plate is a heavy-weight metal that will darken over time, providing even, efficient cooking.

Tin plate pans (denoted with "T" at the beginning or end of the item number) should be seasoned before use and may need periodic re-seasoning.

- Will darken with use and rust if refrigerated, soaked in water or left unseasoned in damp environments.
- Hand-wash and wipe-dry immediately.
- Call for additional tin plate pan options.

How to Season

To season, wash in warm, soapy water and quickly dry. Brush oil on inside and outside surfaces of the pan and bake to a golden or dark brown. When seasoning, bake at regular times and temperatures. Some pans may need a second or third coating before being fully seasoned.

TIN PLATE (T)

Hard Coat Anodized Pans

Heavy-weight and efficient, hard coat aluminum provides quick and efficient results.

Hard coat pans (denoted with "HC" at the beginning or end of the item number) are anodized with a synergistic electro-chemical process that converts the surface of aluminum into a dark aluminum oxide.

- Made from heavy-weight aluminum unless perforated, in which case they're made from standard-weight aluminum.
- Through repeated use, pans will soften and, if scoured, will thin.
- Season before use and hand-wash with aluminum-safe detergent.

How to Season

Wash and dry the pan thoroughly. Wipe oil on the inside and outside surfaces of the pan and allow to soak in for 30 minutes. Then bake at regular cooking times and temperatures. Do not overbake and do not wash off excess oil. The oil residue and any additional oil added before baking allows the pan to develop non-stick properties. Remember when cleaning hard anodized aluminum, this is considered an amphoteric coating and will be attacked by solutions of a high alkaline or acidic nature. Do not expose these pans to dishwashers or caustic cleaning solutions. Hand-wash with detergents made specifically for aluminum.

HARD COAT ANODIZED (HC)

Please note:

We carry thousands of different pizza trays in varying styles, depths, materials and other options, resulting in tens of thousands of possible combinations. Because each pan is made to order, it's possible that yours is the first of its kind. Special-order pans cannot be cancelled or returned, so please review and re-confirm your order. If you have any questions, give us a call and, if necessary, request a sample.

Nibs (N)

minimum
order
24 pieces

Nibs raise the pizza off of the baking surface, allowing moisture to escape providing a fresher, crispier pizza.

- Nibs are approximately 5/8" (15.9 mm) in diameter and raise the pizza about 1/8" (3.2 mm) above the surface of the pan.
- Any round or square pizza trays or pans measuring 2" (5.1 cm) deep or less, or between 8" (20.3 cm) and 20" (50.8 cm), can be made with nibs.
- Pans with nibs cannot be perforated.
- To order, add "N" to the beginning of the regular item number and note in the body of the order that the pans should be made with nibs.
- Refer to price list or amnow.com for pricing information.

Perf (P)

Perforated pans allow the bottom of the pizza to cook faster and can provide a crispier crust. They can also keep cooked pizzas fresher by allowing moisture to escape.

- Holes are 3/8" (9.5 mm) in diameter.
- Round or square pizza trays or pans less than 21" (53.3 cm) in diameter can be perforated.
- Perf pans cannot be made with nibs.
- To order, add "P" to the beginning or end of the regular item number and note in the body of the order that the pans should be perforated.
- Refer to price list or amnow.com for pricing information.

SuperPerf (SP)

SuperPerf pans have twice as many holes as Perf pans, allowing the bottom of the pizza to cook faster and providing a crispier crust. They can also keep cooked pizzas fresher by allowing moisture to escape.

- Holes are 3/8" (9.5 mm) in diameter.
- Round pans less than 21" (53.3 cm) in diameter can be SuperPerf.
- SuperPerf pans cannot be made with nibs.
- To order, add "SP" to the end of the regular item number and note in the body of the order that the pans should be SuperPerf.
- Refer to price list or amnow.com for pricing information.

Caring for Wood Peels

Want to keep your wood peel looking fresh? Always wipe it clean with a damp cloth. Never put in dishwasher, soak in water, place under a heat lamp or leave on a hot surface. If your peel warps, leave it with the warp facing up overnight and it should flatten out.

CARE AND USE

Melamine Dinnerware, Bowls and Platters

This nearly indestructible line of melamine is long-lasting when cared for properly. It is not recommended for microwave use and should be washed only in a high-temperature dishwasher. Not for use with a heat lamp or in the oven. Regarding serving suggestions, we do not recommend any citric, acidic or strong-colored food products that would have direct contact with melamine. These products can cause staining over time. PET liners that can protect melamine from staining are available for some items.

Wrought Iron Griddles

Prior to using your American Metalcraft Griddle for the first time, hand-wash with a mild detergent and warm water. Then dry thoroughly with a soft cloth. Do not put wrought iron griddles in dishwashers or expose them to abrasive sponges, caustic cleaners or acidic detergents.

Wood Peels and Serving Boards

Wood pizza peels and serving boards should never be soaked in water, even for a few minutes. To clean, simply wipe down with a damp cloth and allow to air-dry. They can be seasoned or sealed with oil. To seal, wipe any food-safe oil such as mineral oil on the surface of the peel. We recommend our Wood Oil sold on pg. 428. If sealed properly, the peel is less likely to pick up unwanted odors, food particles and moisture. If a peel warps, leave overnight with the warp facing up and it should flatten out. Avoid leaving peels on hot surfaces. This increases the chance of warping.

Carbon and Black Steel Pans

Seasoning is recommended. To season, wipe interior of pan with flavorless cooking oil and heat empty pan. When surface becomes hot, remove from heat and allow pan to cool. Repeat this process twice. Color of pan will change to a darker finish. This indicates that pan has gained a natural non-stick protection.

To clean, hand-wash in hot water with mild detergent. Dry with paper towel or place in warm oven for a few minutes. Store in dry place. Do not put in dishwasher or expose to abrasive sponges or acidic detergents. Not suitable for microwave.

CAUTION: Flat iron handle is not heat-resistant

Galvanized Pails and Tubs

To clean, hand-wash in warm water with mild detergent and dry quickly. Do not put in dishwasher or expose to abrasive sponges, bristles, caustic cleaners or acidic detergents. Do not refrigerate, soak in water or use with acidic foods.

Hammered Copper

As beautiful as these lines are, they require special attention when cleaning. Please hand-wash only with a soft cloth. Do not scour with steel wool or abrasive cleaners. Copper polish may be required to maintain the beauty of the surface.

Securit Signs

To erase Securit Original Chalk Marker messages on Table Boards, Mini Chalkboards, Wall Boards, Sandwich Boards and other Securit signage, wipe with a soapy cloth followed by a clean cloth.

Cast Iron

Before First Use

Hand-wash and dry immediately. Rub with a thin, light coat of vegetable oil to restore sheen.

After First Use

Wash with hot water (and mild soap if necessary). Dry immediately and rub with a light coat of vegetable oil. To remove excess residue, use boiling water and a plastic scrub bun or brush. Dishwashing, acidic detergents and scouring pads/bristles are not recommended. Re-season the pan when necessary to prevent food from sticking.

Daily Care Notes

Never put cold water in a hot cast iron pan; this can cause the pan to crack or warp. Store in a cool and dry place. Gas flames should not extend up the sides of cast iron cookware. When deep frying, fill cast iron cookware only to 1/3 of capacity.

PIZZA PANS AND TRAYS

Aluminum Pans and Trays

Aluminum is a soft metal that is attacked by detergents with a high alkaline or acidic nature. Use detergents made specifically for aluminum. Through repeated use, aluminum will soften and, if scoured, will thin. Hand-wash only using mild detergent made specifically for aluminum.

Tin Plate Pans

Tin plate should be seasoned before use and may need periodic re-seasoning. Tin plate will darken with use. Tin plate will also rust if refrigerated, soaked in water or left unseasoned in damp environments. Never soak in water. Wipe dry immediately after hand-washing.

To Season Tin Plate Pans

Wash in warm, soapy water and quickly dry. Brush oil on inside and outside surfaces of the pan and bake to a golden or dark brown. When seasoning, bake at regular times and temperatures. Some pans may need a second or third coating before being fully seasoned.

Hard Coat Pans

These pans are made from heavy-weight aluminum. Hard coat anodizing is a synergistic electro-chemical process that converts the surface of aluminum into aluminum oxide. The aluminum oxide is a dark color. The finish is hard and will not flake off. However, the aluminum underneath is soft and, through repeated use, the pan will soften. If scoured, the pan will thin. Hard coat pans are not non-stick and must be seasoned. Hand-wash only using mild detergent made specifically for aluminum.

To Season Hard Coat Pans

Wash and dry pans thoroughly. Wipe oil on the inside and outside surfaces of the pan and allow it to soak in for 30 minutes. Then, bake at regular cooking times and temperatures. Do not overbake and do not wash off excess oil. Just wipe clean. The oil residue and any additional oil added before baking makes the pan stick-resistant. Do not put these pans in dishwashers or expose them to caustic cleaning solutions. Hand-wash with detergents made specifically for aluminum.

Pizza Stones

This "all-natural" stone is freezer-, microwave- and oven-safe. It is not dishwasher-safe and requires hand-washing. It requires no seasoning or conditioning. Simply rinse in warm water before first use and allow the stone to dry thoroughly. Most recipes suggest preheating stone 15 to 20 minutes for even cooking and to reduce baking time. To prevent cracking, avoid moving directly between extreme temperatures, such as from the oven to cold water. Do not place stone over an open flame or in a broiler. Do not cut directly on stone. Before cleaning, allow to cool completely. Then remove baked-on foods and rinse in warm water. To avoid soapy aftertaste, do not use soap or detergent. Do not soak the stone or clean in a dishwasher. The pizza stone will darken gradually and retain some staining with use. These are a part of the stone's natural seasoning and will not harm it or affect the taste of the food. Handle the stone with care to prevent chipping or breaking.
